CS 5820 Project Documentation

By

Sumit Barua, Hope Fetrow

To operate this project, please follow the following instructions:

1. Create a project directory

   mkdir 'name of the directory'

2. Either unzip the '**CS5820_Project**' folder or clone it from **GitHub**

   git clone https://github.com/shhsumit404/ImgToTxtConversion.git

3. Install virtual environment in the **same** directory

   python -m venv .env

4. Activate the virtual environment

   source .env/bin/activate

5. Change the directory to '**teamocr**'

   cd teamocr

6. Install the dependencies

   pip install -r requirements.txt

7. Run the program

   python manage.py runserver
